

QuantResearch

Unbiased, disciplined performance

Is your current investment advisor adding value to your situation?

With the volatile ups and downs of the market it's important to know how your investments are being selected and maintained.

This is why ScotiaMcLeod created *QuantResearch**; an actively managed investment portfolio designed to outperform during good times and bad.

QuantResearch uses company valuations and trends in profitability and prices to determine which companies are good investments, and which ones aren't.

Here's the proof:

2002:	QuantResearch = 8.1%	Benchmark = -12.4%
2003:	QuantResearch = 22.9%	Benchmark = 26.7%
2004:	QuantResearch = 29.2%	Benchmark = 14.5%
2005:	QuantResearch = 39.1%	Benchmark = 24.1%
2006:	QuantResearch = 33.1%	Benchmark = 17.3%
2007:	QuantResearch = 32.9%	Benchmark = 9.8%
	Average = 27.5%	Average = 13.3%

Where would you rather be?
